ESSENTIAL OIL

EUCALYPTUS OIL

Eucalyptus Oil is a type of essential oil that is derived from the leaves of the eucalyptus tree, a tall evergreen tree. The oil is extracted through steam distillation, which involves heating the leaves of the eucalyptus tree to release the essential oil.

LAVENDER OIL

Lavender essential oil is extracted from the flowers of the lavender plant (Lavandula angustifolia) through steam distillation. It is commonly used for its soothing and calming aroma and has a wide range of therapeutic properties, including as an antiseptic, anti-inflammatory, analgesic, and relaxation-inducing.

CAJEPUT OIL

Cajeput essential oil is extracted from the leaves and twigs of the Cajeput tree (Melaleuca cajuputi), which is native to Southeast Asia. It has a fresh, medicinal aroma and is commonly used in aromatherapy and massage. Some of its potential benefits include reducing pain and inflammation, fighting infections, and improving respiratory health.

TEA TREE OIL

Tea tree essential oil is a popular essential oil that is known for its many benefits. It is extracted from the leaves of the tea tree plant, which is native to Australia. Tea tree oil has been used for centuries by indigenous people for medicinal properties.

CLOVE OIL

Clove essential oil is an essential oil extracted from the buds and leaves of the clove tree, which is native to Indonesia. It has a warm, spicy aroma and is commonly used for its many health benefits. Clove essential oil contains a high concentration of eugenol, which is responsible for many of its therapeutic properties. It is used in aromatherapy, as well as in various household and personal care products.

HENNA OIL

Henna oil is a natural oil that is extracted from the leaves of the henna plant. It is known for its various benefits for hair and skin.
